Study Materials: Qualtrics Survey Converted to PDF

Created by ResearchBox's QSF to PDF converter app (QSF2PDF: v0.7.6), 2026-10-20
Survey ID: SV_en9q7gEnCvYC6VL

This document shows the survey twice, across Part 1 & Part 2

	Page
Part 1: the survey as one random participant would have seen it	**2–50**
Part 2: the full survey with all variations, including validation, randomization rules, js code, etc.	**52–165**

Note on appearance. The survey's visual style (its Qualtrics theme) is not contained in the .qsf file (universities often have custom branded Qualtrics themes that can impact appearance of a survey in a way that cannot be reproduced by QSF2PDF nor any program which runs outside of the originating institution). Fonts, colors, logos, and other styling therefore need not match what participants saw. The content, order, and logic of the survey do come from the .qsf file.

Part 1: the survey as one random participant would have seen it

-- Screen #1 --

Concordia College, Moorhead, MN

INFORMED CONSENT STATEMENT

PLEASE READ BEFORE COMPLETING THE SURVEY

Hello, our names are Claire Clarke, Matthew Kindem, and Kaytlynn Ziegler. We are student researchers researchers in the department of psychology at Concordia College, Moorhead, MN. We would like to invite you to take part in our research concerning mind wandering. The purpose of this study is to investigate the link between mind wandering and reading comprehension.

If you agree to take part in our research, you will be asked to fill out a survey that includes different passages to read and questions about the presented texts. Responding to the surveys should take about 30 minutes of your time. As a token of appreciation for your time, we will offer you the opportunity to enter a drawing for a $15 gift card upon completion of the survey.

Your responses will be confidential. Your name will not be linked to your responses. We will not use your name or other identifying information in any reports of the research. Your anonymous data will be stored indefinitely on the Open Science Framework (OSF), for future analyses.

Your identity and responses will be protected to the extent allowed by law. This means that they will be treated as confidential, unless you disclose information that is construed as threatening to yourself/others, or as indicative of abuse of minors/vulnerable adults.

There are no foreseeable risks to you from participating in this research. We hope that the research will benefit research in our field by providing information about reading comprehension and mind wandering. We also hope that by participating in this study you learn something about what issues are of interest to psychologists, and how research studies are designed and conducted. There will be no costs to you, other than your time involved.

Your participation in this research is voluntary. You are free to refuse to take part. You are free to withdraw your consent and discontinue participation in this study at any time by simply not responding to the questions. If you are participating in this study in order to receive credit for a class, rest assured that you may refuse to answer any question(s) that might make you feel uncomfortable and still receive course credit.

No feedback on individual scores will be provided. You will be provided with a debriefing form when you have completed the survey. You may request a copy of the overall results of the research by calling, Claire Clarke, Matthew Kindem, Kaytlynn Ziegler, at 612-720-4940, 218-766-6231, 218-234-6877 or e-mailing at cclarke@cord.edu, mkindem2@cord.edu, kziegle1@cord.edu.

If you have any questions about your rights or treatment as a participant in this research project, please contact Concordia College's Institutional Review Board at (218) 299-3001, or send a letter to Concordia College, Institutional Review Board, Office of Academic Affairs, 901 8th St. S., Moorhead, MN 56562.

Thank you.

PLEASE FEEL FREE TO PRINT AND KEEP THIS SHEET FOR YOUR FUTURE REFERENCE

Do you agree to participate in this study?

- (●) Yes
- ( ) No

→

-- Screen #2 --

The goal of this study is to learn how mind wandering affects how you learn information during reading.

Mind wandering is a term used to describe what occurs when your attention wanders from a task.

Sometimes when your mind wanders, you begin thinking about personal events or concerns rather than your task. At other times, your mind can wander because you are bored or tired and you don't really know what you're thinking about; all you know is that you are no longer thinking about your task.

→

-- Screen #3 --

In this experiment, you will read **8 passages** and answer reading comprehension questions for each passage.

THE PASSAGES WILL BE PRESENTED IN A SENTENCE-BY-SENTENCE FASHION. Please READ THE SENTENCES AT YOUR NORMAL READING PACE.

Once you have finished reading one sentence, press next to move on to the next sentence. Once you've read a sentence you MAY NOT GO BACK.

→

-- Screen #4 --

THE SET OF READING COMPREHENSION QUESTIONS FOR THAT PARTICULAR PASSAGE YOU'VE FINISHED READING WILL APPEAR AFTER EACH PASSAGE, not all together at the end.

Like the sentences, once you've answered questions you MAY NOT GO BACK TO CHANGE YOUR ANSWERS.

→

-- Screen #5 --

Additionally, while you are reading you will be randomly interrupted and asked "WERE YOU MIND WANDERING WHEN YOU READ THE PREVIOUS SENTENCE?" as the question will appear on your screen. That is, whether your thoughts were off-task rather than focusing on the prior sentence, in which you would have to chose either "Yes" or "No."

→

-- Screen #6 --

This experiment is self-paced. It isn't long, so please try to do the task all the way through instead of taking too many small breaks in between.

→

-- Screen #7 --

Passage 1 starts next

→

-- Screen #8 --

A few had been astute enough to see a fine poet in Browning, and Elizabeth Barrett was one of them.

→

-- Screen #9 --

The young man with the lemon-colored gloves and long dark hair and high-strung, restless manner who had visited her in 1846 had been moved to write to her because she had praised his poetry.

→

-- Screen #10 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #11 --

She found the man even more to her liking than the verse, and it was not so very long-only the time between May, 1845 and September, 1846-before Robert Browning had stolen the poetess from the dour father who guarded her like a dragon (never wanting her to marry any man), and taken her with him to Italy and a new life.

→

-- Screen #12 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #13 --

One morning, soon after their nuptials, Elizabeth Browning thrust a manuscript into her husband's pocket, and then scampered upstairs in a swift confusion to her room.

→

-- Screen #14 --

Written during the time of their courtship and love missives, it was a sonnet sequence on their love.

→

-- Screen #15 --

These poems were never intended by Mrs. Browning to be published, but her poet husband promptly declared that they must be.

→

-- Screen #16 --

The Sonnets from the Portuguese was his suggested title—a title which might shroud the fact that they were personal.

→

-- Screen #17 --

They were in his mind “the finest sonnets written in our language since Shakespeare’s.”

→

-- Screen #18 --

Sonnets from the Portuguese, in Browning’s opinion, was hardly more flattering to his wife than his opinion of most of her poetry.

→

-- Screen #19 --

A better poet than he, thought Browning, and the world at that time agreed with him.

→

-- Screen #20 --

He called her his “moon of poets,” as she considered him her sun.

→

-- Screen #21 --

She was a pure singer with a lovely lyrical tenderness, the best poet of her sex since Sappho.

→

-- Screen #22 --

Her Sonnets, in their autobiographical candor, in their fine restraint and fullness, reveal a woman’s secret soul as had no other poetry in our literature up to that time.

→

-- Screen #23 --

Her lyrical mastery shines in many passages of her writings.

→

-- Screen #24 --

Italy was a kind of promised terrain for Elizabeth Browning.

→

-- Screen #25 --

Living in Florence or in little villages in the summers, she drank in the sun of the south and warmth of her husband’s love, and blossomed in a life of precarious happiness for fifteen years.

→

-- Screen #26 --

In Italy she found friends, most of them cultured Americans.

→

-- Screen #27 --

Hawthorne saw the Browning's there: the New England thinker and essayist Margaret Fuller visited them.

→

-- Screen #28 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #29 --

The painter Story came, and the young sculptress Harriet Hosmer.

→

-- Screen #30 --

One caller records that Robert Browning was “simple, natural, and playful,” and that Mrs. Browning was all 'genius and sensibility.”

→

-- Screen #31 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #32 --

Daytimes Browning walked forth with Elizabeth's little dog Flush, but he seldom could be lured from his home evenings.

→

-- Screen #33 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #34 --

One privileged intruder, coming frequently at night to join the poets over hot chestnuts and mulled wine, found talk good and laughter plentiful.

→

-- Screen #35 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #36 --

During the third year of their stay in Italy, a son, Robert Weidemann Browning, was born.

→

-- Screen #37 --

But through this happy life a strain of dark foreboding began to creep.

→

-- Screen #38 --

Elizabeth Browning's father died unrelenting in his disavowal of her marriage, refusing to see her or to sanction any of his family to see her.

→

-- Screen #39 --

Three children all younger than her own boy were left to her by a dearly beloved sister who died.

→

-- Screen #40 --

She drooped and pined a little and Browning shielded her from ordinary visitants.

→

-- Screen #41 --

She had a sudden and alarming attack of indisposition but was not considered in any precariousness.

→

-- Screen #42 --

One night, soon after, she awoke from a troubled slumber and, apparently with no idea that she was about to leave him, murmured in the tenderest fashion of her love for him, and in his arms her head drooped as though in a faint, but it was the end.

→

-- Screen #43 --

Profound and lasting was Browning's grief. “Looking back,” he said, “I see that we have been all the time walking over a torrent on a straw.”

→

-- Screen #44 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #45 --

Now you will take the reading comprehension test for Passage 1.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #46 --

Flush was the name of the Brownings'

- ( ) cat
- ( ) dog
- (●) canary
- ( ) turtle
- ( ) thrush

→

-- Screen #47 --

At night the Brownings often enjoyed

- ○ hot chestnuts
- ○ a tart with clotted cream
- ○ strawberries and cream
- ◉ café au lait
- ○ cheese soufflé

→

-- Screen #48 --

The Brownings saw

- ○ Coleridge
- ○ Byron
- ◉ Walt Whitman
- ○ Poe
- ○ Hawthorne

→

-- Screen #49 --

Browning wrote to Miss Barrett because she had

- ◉ invited him to visit
- ○ written him for advice
- ○ praised his poetry
- ○ sent him one of her own poems
- ○ sent a friend to meet him

→

-- Screen #50 --

The authors of this passage placed most attention on the Brownings'

- ○ literary efforts
- ○ personal relationships
- ○ social contacts
- ◉ problems
- ○ early meetings

→

-- Screen #51 --

What best describes the Brownings' early days abroad?

- ○ Travel
- ◉ Relaxation
- ○ Creative activity
- ○ Intellectual stimulation
- ○ Happiness

→

-- Screen #52 --

You would assume that Browning

- ◉ found it easy to see Elizabeth
- ○ carefully avoided Mr. Barrett
- ○ begged Mr. Barrett's consent to marry
- ○ understood Mr. Barrett
- ○ got Elizabeth to ask her father's consent

→

-- Screen #53 --

In the "Torrent on a straw" quotation, the word "straw" probably refers to

- ○ the frailty of life
- ○ weakness of character
- ◉ sorrow
- ○ happiness
- ○ the fleeting nature of fame

→

-- Screen #54 --

Passage 2 starts next

→

-- Screen #55 --

Marketing is a business activity that directs the flow of goods and services from a producer to a consumer or user.

→

-- Screen #56 --

It is the link that connects producers and consumers and brings production and consumption together.

→

-- Screen #57 --

About one in every six employees is involved directly in wholesaling or retailing activities.

→

-- Screen #58 --

This ratio does not take into account other employees who assist marketing through transportation, communication, and office jobs.

→

-- Screen #59 --

Marketing provides many different kinds of jobs.

→

-- Screen #60 --

These jobs require a wide range of skills and abilities.

→

-- Screen #61 --

We usually think that the primary job in marketing is selling, but there are jobs in management, advertising, market and product research, and buying.

→

-- Screen #62 --

The economic well-being of our country is determined largely by productivity, consumption, and employment.

→

-- Screen #63 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #64 --

The efficiency of marketing affects all three.

→

-- Screen #65 --

People consume many goods if marketing creates a demand.

→

-- Screen #66 --

High consumption requires high productivity to meet the wants of people, and high productivity and high-level activity in marketing combined result in high employment.

→

-- Screen #67 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #68 --

Marketing is indirectly a key to a high economic level of living for the people.

→

-- Screen #69 --

Now you will take the reading comprehension test for Passage 2.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #70 --

Our economic well-being is determined largely by how many factors?

- ( ) One
- ( ) Two
- (●) Three
- ( ) Four
- ( ) Five

→

-- Screen #71 --

One major factor mentioned as affecting our economic well-being was

- ○ high wages
- ○ low interest rates
- ○ technology
- ◉ employment
- ○ foreign trade

→

-- Screen #72 --

The purpose of this passage is to

- ○ persuade
- ○ guide
- ○ evaluate
- ○ inform
- ◉ interest

→

-- Screen #73 --

The chief emphasis is on

- ○ defining marketing
- ○ principles of marketing
- ◉ opportunities in marketing
- ○ kinds of jobs in marketing
- ○ the economic significance of marketing

→

-- Screen #74 --

Passage 3 starts next

→

-- Screen #75 --

Atomic energy is the energy that holds the nucleus of an atom together.

→

-- Screen #76 --

Atomic reactions in which nuclei of helium are built up from nuclei of hydrogen are believed to be the origin of the sun's energy.

→

-- Screen #77 --

It has been found that the mass of an atomic nucleus is less than the total mass of the separate particles that comprise it.

→

-- Screen #78 --

The reason is that when a nucleus forms, part of the mass of the component particles is changed into energy, which is then radiated away.

→

-- Screen #79 --

The quantity of energy released in reactions of this kind is almost inconceivably greater than the quantity released by any other type of reaction involving similar quantities of material.

→

-- Screen #80 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #81 --

Every second, a million times as much energy as is stored in all our coal, petroleum, and natural gas fields is sent into space by the sun.

→

-- Screen #82 --

If one could duplicate the method by which this energy is released, the world could be revolutionized.

→

-- Screen #83 --

And the possibility of doing just this is no more inconceivable today than the concept of an atomic bomb was in 1900.

→

-- Screen #84 --

The time may come when the hydrogen from a cubic mile of sea water will provide enough energy to satisfy our needs at the 1960 rate for 300 centuries.

→

-- Screen #85 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #86 --

Now you will take the reading comprehension test for Passage 3.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #87 --

How much sea water was mentioned?

- ( ) One ton
- ( ) A cubic acre
- ( ) A cubic mile
- ( ) A thousand gallons
- (●) A hundred tons

→

-- Screen #88 --

The quantity of energy released in an atomic reaction is spoken of as how much greater than with other types of reactions?

- (●) Far greater
- ( ) Unbelievably greater
- ( ) A thousand times greater
- ( ) Inconceivably greater
- ( ) Tremendously greater

→

-- Screen #89 --

The primary focus is on

- ( ) how much energy is released
- ( ) where energy is found
- ( ) the energy from atomic reactions
- ( ) what happens in an atomic reaction
- (●) the energy present in sunshine

→

-- Screen #90 --

This passage is best described as

- ( ) objective
- (●) skeptical
- ( ) cautious
- ( ) conservative
- ( ) optimistic

→

-- Screen #91 --

Passage 4 starts next

→

-- Screen #92 --

The possibility of life on Mars is not dismissed even by skeptics.

→

-- Screen #93 --

They seem to share our hope that it is true.

→

-- Screen #94 --

So, it was disappointing when scientists studied photos from the early Mariner space flights in the mid-1960's.

→

-- Screen #95 --

They saw no canals, no seas, and no busy Martian engineers.

→

-- Screen #96 --

They saw no dangerous, warlike Martians as huge as skyscrapers.

→

-- Screen #97 --

All they saw were mountains, craters, cold winds, and dust storms.

→

-- Screen #98 --

It was almost as if scouts for Columbus had returned to Isabella's court with the news that the world had turned out to be flat after all.

→

-- Screen #99 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #100 --

Hopeful astronomers reminded us that the Mariner IV had photographed a mere one percent of the Martian surface from 2,000 miles away.

→

-- Screen #101 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #102 --

In addition, the photos were taken from 2,000 miles away.

→

-- Screen #103 --

And they pointed out that the Earth-orbiting Tiros weather satellite shot over 20,000 pictures before uncovering any evidence of life on Earth.

→

-- Screen #104 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #105 --

But still, public enthusiasm for Martian exploration wilted.

→

-- Screen #106 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #107 --

Few people seemed to care about life on Mars by the time Viking I landed on the Plain of Chrise in August.

→

-- Screen #108 --

One Viking scientist, J. Richard Keefe, said that he was “disgusted” at the “blasé...apathetic” public response and the skimpy television coverage of one of the most magnificent scientific and technical accomplishments in human history.

→

-- Screen #109 --

Now you will take the reading comprehension test for Passage 4.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #110 --

One weather satellite was named

- ○ Latos
- ◉ Tiros
- ○ Prometheus
- ○ Sonar
- ○ Satelos

→

-- Screen #111 --

One of the Mariners photographed how much of the surface of Mars?

- ◉ One percent
- ○ Two percent
- ○ Three percent
- ○ Four percent
- ○ Five percent

→

-- Screen #112 --

Interest in Mars diminished largely because

- ○ no Martians were found
- ○ the TV coverage was poor
- ○ the photographs were all black and white
- ○ nothing was brought back to earth
- ◉ the media did not appreciate the accomplishment

→

-- Screen #113 --

Mention of the flat world was used to point out

- ○ the flatness of Mars
- ○ the lack of canals
- ○ the lack of seas
- ○ the lack of Martians
- ◉ the lack of mountains

→

-- Screen #114 --

Passage 5 starts next

→

-- Screen #115 --

The flavor, odor, and character so highly prized by the gourmet is given to cheese by fungi.

→

-- Screen #116 --

In caves near the French village of Roquefort was first found one such mold. A peasant boy left his lunch, a mild fresh piece of goat cheese, according to legend, in one of these caverns and on returning found it marbled, tart, and redolent.

→

-- Screen #117 --

Only cheeses from the area around these particular caves are permitted to bear the name of Roquefort.

→

-- Screen #118 --

As early as the seventeenth century, ergot, the fungus of rye, was used to facilitate childbirth.

→

-- Screen #119 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #120 --

The contraction of the involuntary muscles, particularly of the uterus, is one of its effects.

→

-- Screen #121 --

In the twentieth century, ergot has once more attracted interest as the source of the chemical from which the hallucinogenic drug LSD is derived.

→

-- Screen #122 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #123 --

Most of the modern antibiotics are produced by fungi.

→

-- Screen #124 --

The first of these was discovered by Alexander Fleming, who noted that a mold of the genus Penicillium which had contaminated a culture of staphylococcus growing on a nutrient agar plate had completely halted the proliferation of the bacteria.

→

-- Screen #125 --

Antibiotics, of which many hundreds have now been discovered, are substances produced by a living organism that injure another living organism.

→

-- Screen #126 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #127 --

Now you will take the reading comprehension test for Passage 5.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #128 --

A fungus was used as medicine as early as what century?

- (●) Sixteenth
- ( ) Seventeenth
- ( ) Eighteenth
- ( ) Nineteenth
- ( ) Tweenthieth

→

-- Screen #129 --

How many antibiotics have been discovered?

- (●) Ninety-sixth
- ( ) Many-hundereds
- ( ) Thousands
- ( ) Millions
- ( ) An unspecified number

→

-- Screen #130 --

This passage is mainly about

- (●) ergot
- ( ) drugs
- ( ) fungi
- ( ) antibiotics
- ( ) cheese

→

-- Screen #131 --

LSD is specifically mentioned to show that ergot

- ( ) needs to be further controlled
- ( ) needs further research
- ( ) has medicinal value
- ( ) is of current interest
- (●) is dangerous

→

-- Screen #132 --

Passage 6 starts next

→

-- Screen #133 --

Local governments were our first governments.

→

-- Screen #134 --

Where you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #135 --

A local government was established when the oldest men in a primitive tribe formed a council and the tribe chose a chief.

→

-- Screen #136 --

The tribe was seeking a better, safer life.

→

-- Screen #137 --

In the same way, the first English settlers soon realized that they needed rules and leaders after they landed at Jamestown, Virginia in 1607.

→

-- Screen #138 --

At first, the settlers had to look out for themselves.

→

-- Screen #139 --

They searched for gold, and had to find their own food and provide their own shelter.

→

-- Screen #140 --

As food supplies began to run low, and as the colonists faced hunger and disease, they saw that they needed to work together if the colony was to survive.

→

-- Screen #141 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #142 --

So, they needed to work together if the colony was to survive.

→

-- Screen #143 --

The colonists formed a council to make laws for the colony.

→

-- Screen #144 --

They chose Captain John Smith as president of the council.

→

-- Screen #145 --

His job was to see that the laws were carried out.

→

-- Screen #146 --

This government at Jamestown was the first local government in America.

→

-- Screen #147 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #148 --

Today, local government is still the first and most important one in our lives.

→

-- Screen #149 --

It protects our lives, our safety, and our homes, and it helps to keep our environment clean.

→

-- Screen #150 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #151 --

Local government provides us with schools, libraries, and other important services.

→

-- Screen #152 --

Now you will take the reading comprehension test for Passage 6.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #153 --

The first colonial government was

- (●) tribal
- ( ) city
- ( ) county
- ( ) local
- ( ) federal

→

-- Screen #154 --

The Jamestown colonists formed a government because of

- ( ) pride
- ( ) greed
- (●) necessity
- ( ) togetherness
- ( ) public spirit

→

-- Screen #155 --

The best title for this selection would be

- ( ) John Smith
- ( ) The First Government
- ( ) Jamestown
- (●) Local Government
- ( ) American Government

→

-- Screen #156 --

The overall goal of local government seems to be public

- ○ regulation
- ○ wealth
- ◉ growth
- ○ welfare
- ○ protection

→

-- Screen #157 --

Passage 7 starts next

→

-- Screen #158 --

Once in a while you will hear about an artist recognized as a master during his own lifetime but then almost forgotten soon after his death.

→

-- Screen #159 --

A good example is the painter Domenicos Theotocopoulos, known because of his Greek ancestry as El Greco.

→

-- Screen #160 --

After pursuing his early career in Italy, El Greco settled in the Spanish city of Toledo, where he prospered for the rest of his life.

→

-- Screen #161 --

Were you mind wandering when you read the previous sentence?

- (●) Yes
- ( ) No

→

-- Screen #162 --

But after his death, El Greco was forgotten by history for nearly three hundred years, until he was rediscovered by artists and critics of the twentieth century.

→

-- Screen #163 --

The power of El Greco's intensely emotional style can be felt most strongly in his later canvases, such as the famous View of Toledo painted in 1610, only a few years before death.

→

-- Screen #164 --

One notices in this strange landscape how the eerie, silvery buildings take on a ghost-like stillness next to the explosive light of the sky and the writhing forms of the countryside below.

→

-- Screen #165 --

Curiously enough, another important artist of about the same time was scorned even by many of his own contemporaries.

→

-- Screen #166 --

This artist was Caravaggio, a self-taught painter who had come to Rome around 1590 from a small town in Lombardy.

→

-- Screen #167 --

Caravaggio's critics complained that he treated exalted religious subjects in a low, vulgar style, because he included in his paintings the faces and figures from the street of common people.

→

-- Screen #168 --

By using stark contrasts of light and shadow, Caravaggio managed to conjure up unforgettable scenes of dramatic realism.

→

-- Screen #169 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #170 --

Now you will take the reading comprehension test for Passage 7.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #171 --

In his paintings, Caravaggio included

- ○ common people
- ○ strange landscapes
- ◉ eerie, silvery buildings
- ○ ghosts
- ○ corpses

→

-- Screen #172 --

El Greco pursued his early career in

- ○ Italy
- ○ Greece
- ○ Lombardy
- ○ Rome
- ◉ Toledo

→

-- Screen #173 --

Apparently a major technique of Caravaggio's was

- ○ using exalted religious subjects
- ○ using stark contrasts
- ◉ using cadavers
- ○ using ghost-like stillness
- ○ none of the above

→

-- Screen #174 --

The principal idea discussed in this passage concerns

- ○ El Greco
- ○ Caravaggio
- ○ Contemporary approval of artists
- ○ The travels of painters
- ◉ The prosperity of artists

→

-- Screen #175 --

Passage 8 starts next

→

-- Screen #176 --

Random assignment is the key to experimental design.

→

-- Screen #177 --

Random assignment insures that the results of experiments are not influenced by some extraneous variable.

→

-- Screen #178 --

An extraneous variable is one that is correlated with the variable under investigation.

→

-- Screen #179 --

In contrast, correlational designs allow subjects to assign themselves to conditions.

→

-- Screen #180 --

Thus, in the cancer studies as they have been done, only people who are four-pack-a-day smokers—by their own “choice”—get into a four-pack-a-day condition.

→

-- Screen #181 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #182 --

But, the factors that make people four-pack-a-day smokers must surely make them different from typical nonsmokers in other ways.

→

-- Screen #183 --

Hence the ambiguity of interpretation in correlational designs, and hence the virtue of experimental designs.

→

-- Screen #184 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #185 --

Differences among individual subjects cannot systematically confound the results if assignment to conditions is truly random.

→

-- Screen #186 --

Put another way, the experimenter has under his control all the variables that can influence the results.

→

-- Screen #187 --

Were you mind wandering when you read the previous sentence?

- ○ Yes
- ◉ No

→

-- Screen #188 --

It is another question as to whether they can exactly identify these variables.

→

-- Screen #189 --

Thus, the results from experimental designs are not entirely unambiguous, but they are less ambiguous than the results from correlational designs.

→

-- Screen #190 --

Now you will take the reading comprehension test for Passage 8.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #191 --

Specific mention is made of

- (●) psychogenesis
- ( ) psychodynamics
- ( ) psychobiology
- ( ) psychotherapy
- ( ) none of the above

→

-- Screen #192 --

How many research design patterns were discussed?

- ( ) One only
- ( ) Two
- (●) Three
- ( ) Four
- ( ) Five

→

-- Screen #193 --

As used in this passage, the phrase "put another way" means

- (●) rephrasing
- ( ) enumeration
- ( ) using details
- ( ) reasoning
- ( ) illustration

→

-- Screen #194 --

In this passage the authors imply that heavy smoking is probably caused by

- ○ tension
- ○ nervousness
- ○ habit
- ○ social pressure
- ◉ all of the above and more

→

-- Screen #195 --

This is the end of the survey. If you would like to be entered into a drawing for a $15 gift card, please provide us with your email below.

-- Screen #196 --

Debriefing Form
Thank you for agreeing to participate in our research project. We greatly appreciate you taking the time to contribute to our research. We hope the study went well.

We wanted to take a moment to explain a few more details of our study. We are interested in the association between reading task levels and mind wandering. There is some debate in research as
to what reading levels result in more mind wandering. Some research indicates that mind wandering can occur more easily in easier tasks due to more available mental resources, but other research indicates that mind wandering occurs more easily in difficult tasks due to the task being less accessible and thus not sustaining attention well.

If you have any questions regarding the survey please contact Claire Clarke at cclarke@cord.edu, or 612-720-4940.

We will be continuing to recruit participants for this experiment and would appreciate if you did not share any elements of this study with friends or peers.
It may alter results if participants knew in advanced that the study was specifically about reading difficulty and mind
wandering. Being aware of this my change participant performance on the study.
Thank you again for participating in our study!

Block 1 Consent

-- Screen #197 --

Q1

Concordia College, Moorhead, MN

INFORMED CONSENT STATEMENT

PLEASE READ BEFORE COMPLETING THE SURVEY

Hello, our names are Claire Clarke, Matthew Kindem, and Kaytlynn Ziegler. We are student researchers researchers in the department of psychology at Concordia College, Moorhead, MN. We would like to invite you to take part in our research concerning mind wandering. The purpose of this study is to investigate the link between mind wandering and reading comprehension.

If you agree to take part in our research, you will be asked to fill out a survey that includes different passages to read and questions about the presented texts. Responding to the surveys should take about 30 minutes of your time. As a token of appreciation for your time, we will offer you the opportunity to enter a drawing for a $15 gift card upon completion of the survey.

Your responses will be confidential. Your name will not be linked to your responses. We will not use your name or other identifying information in any reports of the research. Your anonymous data will be stored

indefinitely on the Open Science Framework (OSF), for future analyses.

Your identity and responses will be protected to the extent allowed by law. This means that they will be treated as confidential, unless you disclose information that is construed as threatening to yourself/others, or as indicative of abuse of minors/vulnerable adults.

There are no foreseeable risks to you from participating in this research. We hope that the research will benefit research in our field by providing information about reading comprehension and mind wandering. We also hope that by participating in this study you learn something about what issues are of interest to psychologists, and how research studies are designed and conducted. There will be no costs to you, other than your time involved.

Your participation in this research is voluntary. You are free to refuse to take part. You are free to withdraw your consent and discontinue participation in this study at any time by simply not responding to the questions. If you are participating in this study in order to receive credit for a class, rest assured that you may refuse to answer any question(s) that might make you feel uncomfortable and still receive course credit.

No feedback on individual scores will be provided. You will be provided with a debriefing form when you have completed the survey. You may request a copy of the overall results of the research by calling, Claire Clarke, Matthew Kindem, Kaytlynn Ziegler, at 612-720-4940, 218-766-6231, 218-234-6877 or e-mailing at cclarke@cord.edu, mkindem2@cord.edu, kziegle1@cord.edu.

If you have any questions about your rights or treatment as a participant in this research project, please contact Concordia College's Institutional Review Board at (218) 299-3001, or send a letter to Concordia College, Institutional Review Board, Office of Academic Affairs, 901 8th St. S., Moorhead, MN 56562.

Thank you.

PLEASE FEEL FREE TO PRINT AND KEEP THIS SHEET FOR YOUR FUTURE REFERENCE

Do you agree to participate in this study?

- ◯ Yes
- ◯ No

Q2

Debriefing Form

Thank you for agreeing to participate in our research project. We greatly appreciate you taking the time to contribute to our research. We hope the study went well.

We wanted to take a moment to explain a few more details of our study. We are interested in the association between reading task levels and mind wandering. There is some debate in research as to what reading levels result in more mind wandering. Some research indicates that mind wandering can occur more easily in easier tasks due to more available mental resources, but other research indicates that mind wandering occurs more easily in difficult tasks due to the task being less accessible and thus not sustaining attention well.

If you have any questions regarding the survey please contact Claire Clarke at cclarke@cord.edu, or 612-720-4940.

We will be continuing to recruit participants for this experiment and would appreciate if you did not share any elements of this study with friends or peers. It may alter results if participants knew in advanced that the study was specifically about reading difficulty and mind wandering. Being aware of this my change participant performance on the study.
Thank you again for participating in our study!

→

End of survey: participants who reach this point leave the survey here.

End of condition

Block 3 Instructions

-- Screen #199 --

Q3

The goal of this study is to learn how mind wandering affects how you learn information during reading.

Mind wandering is a term used to describe what occurs when your attention wanders from a task.

Sometimes when your mind wanders, you begin thinking about personal events or concerns rather than your task. At other times, your mind can wander because you are bored or tired and you don't really know what you're thinking about; all you know is that you are no longer thinking about your task.

→

-- Screen #200 --

Q4

In this experiment, you will read **8 passages** and answer reading comprehension questions for each passage.

THE PASSAGES WILL BE PRESENTED IN A SENTENCE-BY-SENTENCE FASHION. Please READ THE SENTENCES AT YOUR NORMAL READING PACE.

Once you have finished reading one sentence, press next to move on to the next sentence. Once you've read a sentence you MAY NOT GO BACK.

→

-- Screen #201 --

Q5

THE SET OF READING COMPREHENSION QUESTIONS FOR THAT PARTICULAR PASSAGE YOU'VE FINISHED READING WILL APPEAR AFTER EACH PASSAGE, not all together at the end.

Like the sentences, once you've answered questions you MAY NOT GO BACK TO CHANGE YOUR ANSWERS.

→

-- Screen #202 --

Q6

Additionally, while you are reading you will be randomly interrupted and asked "WERE YOU MIND WANDERING WHEN YOU READ THE PREVIOUS SENTENCE?" as the question will appear on your screen. That is, whether your thoughts were off-task rather than focusing on the prior sentence, in which you would have to chose either "Yes" or "No."

→

-- Screen #203 --

Q7

This experiment is self-paced. It isn't long, so please try to do the task all the way through instead of taking too many small breaks in between.

→

▸ Random assignment #1: each participant sees one of the following 2 conditions (evenly presented).

1A Block “Booklet 1: Odd Passages are Difficult”

1B Block “Booklet 2: Odd Passages are Easy”

1A Block “Booklet 1: Odd Passages are Difficult”

Block 4 Booklet 1: Odd Passages are Difficult

-- Screen #204 --

Q8

Passage 1 starts next

→

-- Screen #205 --

Q9

A few had been astute enough to see a fine poet in Browning, and Elizabeth Barrett was one of them.

→

-- Screen #206 --

Q11

The young man with the lemon-colored gloves and long dark hair and high-strung, restless manner who had visited her in 1846 had been moved to write to her because she had praised his poetry.

Hidden page timer (Q10) records time spent on this page.

→

-- Screen #207 --

Q12

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #208 --

Q14

She found the man even more to her liking than the verse, and it was not so very long-only the time between May, 1845 and September, 1846-before Robert Browning had stolen the poetess from the dour father who guarded her like a dragon (never wanting her to marry any man), and taken her with him to Italy and a new life.

Hidden page timer (Q13) records time spent on this page.

→

-- Screen #209 --

Q15

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #210 --

Q16

One morning, soon after their nuptials, Elizabeth Browning thrust a manuscript into her husband's pocket, and then scampered upstairs in a swift confusion to her room.

→

-- Screen #211 --

Q17

Written during the time of their courtship and love missives, it was a sonnet sequence on their love.

→

-- Screen #212 --

Q18

These poems were never intended by Mrs. Browning to be published, but her poet husband promptly declared that they must be.

→

-- Screen #213 --

Q19

The Sonnets from the Portuguese was his suggested title—a title which might shroud the fact that they were personal.

→

-- Screen #214 --

Q20

They were in his mind “the finest sonnets written in our language since Shakespeare’s.”

→

-- Screen #215 --

Q21

Sonnets from the Portuguese, in Browning’s opinion, was hardly more flattering to his wife than his opinion of most of her poetry.

→

-- Screen #216 --

Q22

A better poet than he, thought Browning, and the world at that time agreed with him.

→

-- Screen #217 --

Q23

He called her his “moon of poets,” as she considered him her sun.

→

-- Screen #218 --

Q24

She was a pure singer with a lovely lyrical tenderness, the best poet of her sex since Sappho.

→

-- Screen #219 --

Q25

Her Sonnets, in their autobiographical candor, in their fine restraint and fullness, reveal a woman's secret soul as had no other poetry in our literature up to that time.

→

-- Screen #220 --

Q26

Her lyrical mastery shines in many passages of her writings.

→

-- Screen #221 --

Q27

Italy was a kind of promised terrain for Elizabeth Browning.

→

-- Screen #222 --

Q28

Living in Florence or in little villages in the summers, she drank in the sun of the south and warmth of her husband's love, and blossomed in a life of precarious happiness for fifteen years.

→

-- Screen #223 --

Q29

In Italy she found friends, most of them cultured Americans.

→

-- Screen #224 --

Q31

Hawthorne saw the Browning's there: the New England thinker and essayist Margaret Fuller visited them.

▸ *Hidden page timer (Q30) records time spent on this page.*

→

-- Screen #225 --

Q32

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #226 --

Q33

The painter Story came, and the young sculptress Harriet Hosmer.

→

-- Screen #227 --

Q35

One caller records that Robert Browning was “simple, natural, and playful,” and that Mrs. Browning was all 'genius and sensibility.”

▸ *Hidden page timer (Q34) records time spent on this page.*

→

-- Screen #228 --

Q36

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #229 --

Q38

Daytimes Browning walked forth with Elizabeth's little dog Flush, but he seldom could be lured from his home evenings.

▸ *Hidden page timer (Q37) records time spent on this page.*

→

-- Screen #230 --

Q39

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #231 --

Q41

One privileged intruder, coming frequently at night to join the poets over hot chestnuts and mulled wine, found talk good and laughter plentiful.

▸ *Hidden page timer (Q40) records time spent on this page.*

→

-- Screen #232 --

Q42

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #233 --

Q43

During the third year of their stay in Italy, a son, Robert Weidemann Browning, was born.

→

-- Screen #234 --

Q44

But through this happy life a strain of dark foreboding began to creep.

→

-- Screen #235 --

Q45

Elizabeth Browning's father died unrelenting in his disavowal of her marriage, refusing to see her or to sanction any of his family to see her.

→

-- Screen #236 --

Q46

Three children all younger than her own boy were left to her by a dearly beloved sister who died.

→

-- Screen #237 --

Q47

She drooped and pined a little and Browning shielded her from ordinary visitants.

→

-- Screen #238 --

Q48

She had a sudden and alarming attack of indisposition but was not considered in any precariousness.

→

-- Screen #239 --

Q49

One night, soon after, she awoke from a troubled slumber and, apparently with no idea that she was about to leave him, murmured in the tenderest fashion of her love for him, and in his arms her head drooped as though in a faint, but it was the end.

→

-- Screen #240 --

Q51

Profound and lasting was Browning's grief. “Looking back,” he said, “I see that we have been all the time walking over a torrent on a straw.”

Hidden page timer (Q50) records time spent on this page.

→

-- Screen #241 --

Q52

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #242 --

Q53

Now you will take the reading comprehension test for Passage 1.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #243 --

Q54

Flush was the name of the Brownings'

- ◯ cat
- ◯ dog
- ◯ canary
- ◯ turtle
- ◯ thrush

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #244 --

Q55

At night the Brownings often enjoyed

- ◯ hot chestnuts
- ◯ a tart with clotted cream
- ◯ strawberries and cream
- ◯ café au lait
- ◯ cheese soufflé

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #245 --

Q56

The Brownings saw

- ◯ Coleridge
- ◯ Byron
- ◯ Walt Whitman
- ◯ Poe
- ◯ Hawthorne

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #246 --

Q57

Browning wrote to Miss Barrett because she had

- ◯ invited him to visit
- ◯ written him for advice
- ◯ praised his poetry
- ◯ sent him one of her own poems
- ◯ sent a friend to meet him

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #247 --

Q58

The authors of this passage placed most attention on the Brownings'

- ◯ literary efforts
- ◯ personal relationships
- ◯ social contacts
- ◯ problems
- ◯ early meetings

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #248 --

Q59

What best describes the Brownings' early days abroad?

- ◯ Travel
- ◯ Relaxation
- ◯ Creative activity
- ◯ Intellectual stimulation
- ◯ Happiness

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #249 --

Q60

You would assume that Browning

- ◯ found it easy to see Elizabeth
- ◯ carefully avoided Mr. Barrett
- ◯ begged Mr. Barrett's consent to marry
- ◯ understood Mr. Barrett
- ◯ got Elizabeth to ask her father's consent

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #250 --

Q61

In the "Torrent on a straw" quotation, the word "straw" probably refers to

- ◯ the frailty of life
- ◯ weakness of character
- ◯ sorrow
- ◯ happiness
- ◯ the fleeting nature of fame

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #251 --

Q62

Passage 2 starts next

→

-- Screen #252 --

Q63

Marketing is a business activity that directs the flow of goods and services from a producer to a consumer or user.

→

-- Screen #253 --

Q64

It is the link that connects producers and consumers and brings production and consumption together.

→

-- Screen #254 --

Q65

About one in every six employees is involved directly in wholesaling or retailing activities.

→

-- Screen #255 --

Q66

This ratio does not take into account other employees who assist marketing through transportation, communication, and office jobs.

→

-- Screen #256 --

Q67

Marketing provides many different kinds of jobs.

→

-- Screen #257 --

Q68

These jobs require a wide range of skills and abilities.

→

-- Screen #258 --

Q69

We usually think that the primary job in marketing is selling, but there are jobs in management, advertising, market and product research, and buying.

→

-- Screen #259 --

Q71

The economic well-being of our country is determined largely by productivity, consumption, and employment.

▸ *Hidden page timer (Q70) records time spent on this page.*

→

-- Screen #260 --

Q72

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #261 --

Q73

The efficiency of marketing affects all three.

→

-- Screen #262 --

Q74

People consume many goods if marketing creates a demand.

→

-- Screen #263 --

Q76

High consumption requires high productivity to meet the wants of people, and high productivity and high-level activity in marketing combined result in high employment.

▸ *Hidden page timer (Q75) records time spent on this page.*

→

-- Screen #264 --

Q77

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #265 --

Q78

Marketing is indirectly a key to a high economic level of living for the people.

→

-- Screen #266 --

Q79

Now you will take the reading comprehension test for Passage 2.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #267 --

Q80

Our economic well-being is determined largely by how many factors?

- ◯ One
- ◯ Two
- ◯ Three
- ◯ Four
- ◯ Five

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #268 --

Q81

One major factor mentioned as affecting our economic well-being was

- ◯ high wages
- ◯ low interest rates
- ◯ technology
- ◯ employment
- ◯ foreign trade

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #269 --

Q82

The purpose of this passage is to

- ◯ persuade
- ◯ guide
- ◯ evaluate
- ◯ inform
- ◯ interest

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #270 --

Q83

The chief emphasis is on

- ◯ defining marketing
- ◯ principles of marketing
- ◯ opportunities in marketing
- ◯ kinds of jobs in marketing
- ◯ the economic significance of marketing

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #271 --

Q84

Passage 3 starts next

→

-- Screen #272 --

Q85

Atomic energy is the energy that holds the nucleus of an atom together.

→

-- Screen #273 --

Q86

Atomic reactions in which nuclei of helium are built up from nuclei of hydrogen are believed to be the origin of the sun's energy.

→

-- Screen #274 --

Q87

It has been found that the mass of an atomic nucleus is less than the total mass of the separate particles that comprise it.

→

-- Screen #275 --

Q88

The reason is that when a nucleus forms, part of the mass of the component particles is changed into energy, which is then radiated away.

→

-- Screen #276 --

Q90

The quantity of energy released in reactions of this kind is almost inconceivably greater than the quantity released by any other type of reaction involving similar quantities of material.

▸ *Hidden page timer (Q89) records time spent on this page.*

→

-- Screen #277 --

Q91

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #278 --

Q92

Every second, a million times as much energy as is stored in all our coal, petroleum, and natural gas fields is sent into space by the sun.

→

-- Screen #279 --

Q93

If one could duplicate the method by which this energy is released, the world could be revolutionized.

→

-- Screen #280 --

Q94

And the possibility of doing just this is no more inconceivable today than the concept of an atomic bomb was in 1900.

→

-- Screen #281 --

Q96

The time may come when the hydrogen from a cubic mile of sea water will provide enough energy to satisfy our needs at the 1960 rate for 300 centuries.

▸ *Hidden page timer (Q95) records time spent on this page.*

→

-- Screen #282 --

Q97

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #283 --

Q98

Now you will take the reading comprehension test for Passage 3.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #284 --

Q99

How much sea water was mentioned?

- ◯ One ton
- ◯ A cubic acre
- ◯ A cubic mile
- ◯ A thousand gallons
- ◯ A hundred tons

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #285 --

Q100

The quantity of energy released in an atomic reaction is spoken of as how much greater than with other types of reactions?

- ◯ Far greater
- ◯ Unbelievably greater
- ◯ A thousand times greater
- ◯ Inconceivably greater
- ◯ Tremendously greater

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #286 --

Q101

The primary focus is on

- ◯ how much energy is released
- ◯ where energy is found
- ◯ the energy from atomic reactions
- ◯ what happens in an atomic reaction
- ◯ the energy present in sunshine

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #287 --

Q102

This passage is best described as

- ◯ objective
- ◯ skeptical
- ◯ cautious
- ◯ conservative
- ◯ optimistic

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #288 --

Q103

Passage 4 starts next

→

-- Screen #289 --

Q104

The possibility of life on Mars is not dismissed even by skeptics.

→

-- Screen #290 --

Q105

They seem to share our hope that it is true.

→

-- Screen #291 --

Q106

So, it was disappointing when scientists studied photos from the early Mariner space flights in the mid-1960's.

→

-- Screen #292 --

Q107

They saw no canals, no seas, and no busy Martian engineers.

→

-- Screen #293 --

Q108

They saw no dangerous, warlike Martians as huge as skyscrapers.

→

-- Screen #294 --

Q109

All they saw were mountains, craters, cold winds, and dust storms.

→

-- Screen #295 --

Q111

It was almost as if scouts for Columbus had returned to Isabella's court with the news that the world had turned out to be flat after all.

Hidden page timer (Q110) records time spent on this page.

→

-- Screen #296 --

Q112

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #297 --

Q114

Hopeful astronomers reminded us that the Mariner IV had photographed a mere one percent of the Martian surface from 2,000 miles away.

Hidden page timer (Q113) records time spent on this page.

→

-- Screen #298 --

Q115

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #299 --

Q116

In addition, the photos were taken from 2,000 miles away.

→

-- Screen #300 --

Q118

And they pointed out that the Earth-orbiting Tiros weather satellite shot over 20,000 pictures before uncovering any evidence of life on Earth.

▸ *Hidden page timer (Q117) records time spent on this page.*

→

-- Screen #301 --

Q119

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #302 --

Q121

But still, public enthusiasm for Martian exploration wilted.

▸ *Hidden page timer (Q120) records time spent on this page.*

→

-- Screen #303 --

Q122

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #304 --

Q123

Few people seemed to care about life on Mars by the time Viking I landed on the Plain of Chrise in August.

→

-- Screen #305 --

Q124

One Viking scientist, J. Richard Keefe, said that he was “disgusted” at the “blasé...apathetic” public response and the skimpy television coverage of one of the most magnificent scientific and technical accomplishments in human history.

→

-- Screen #306 --

Q125

Now you will take the reading comprehension test for Passage 4.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #307 --

Q126

One weather satellite was named

- ◯ Latos
- ◯ Tiros
- ◯ Prometheus
- ◯ Sonar
- ◯ Satelos

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #308 --

Q127

One of the Mariners photographed how much of the surface of Mars?

- ◯ One percent
- ◯ Two percent
- ◯ Three percent
- ◯ Four percent
- ◯ Five percent

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #309 --

Q128

Interest in Mars diminished largely because

- ◯ no Martians were found
- ◯ the TV coverage was poor
- ◯ the photographs were all black and white
- ◯ nothing was brought back to earth
- ◯ the media did not appreciate the accomplishment

Response requested (participants are warned if they skip it).

→

-- Screen #310 --

Q129

Mention of the flat world was used to point out

- ◯ the flatness of Mars
- ◯ the lack of canals
- ◯ the lack of seas
- ◯ the lack of Martians
- ◯ the lack of mountains

Response requested (participants are warned if they skip it).

→

-- Screen #311 --

Q130

Passage 5 starts next

→

-- Screen #312 --

Q131

The flavor, odor, and character so highly prized by the gourmet is given to cheese by fungi.

→

-- Screen #313 --

Q132

In caves near the French village of Roquefort was first found one such mold. A peasant boy left his lunch, a mild fresh piece of goat cheese, according to legend, in one of these caverns and on returning found it marbled, tart, and redolent.

→

-- Screen #314 --

Q133

Only cheeses from the area around these particular caves are permitted to bear the name of Roquefort.

→

-- Screen #315 --

Q135

As early as the seventeenth century, ergot, the fungus of rye, was used to facilitate childbirth.

▸ *Hidden page timer (Q134) records time spent on this page.*

→

-- Screen #316 --

Q136

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #317 --

Q137

The contraction of the involuntary muscles, particularly of the uterus, is one of its effects.

→

-- Screen #318 --

Q139

In the twentieth century, ergot has once more attracted interest as the source of the chemical from which the hallucinogenic drug LSD is derived.

▸ *Hidden page timer (Q138) records time spent on this page.*

→

-- Screen #319 --

Q140

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #320 --

Q141

Most of the modern antibiotics are produced by fungi.

→

-- Screen #321 --

Q142

The first of these was discovered by Alexander Fleming, who noted that a mold of the genus Penicillium which had contaminated a culture of staphylococcus growing on a nutrient agar plate had completely halted the proliferation of the bacteria.

→

-- Screen #322 --

Q144

Antibiotics, of which many hundreds have now been discovered, are substances produced by a living organism that injure another living organism.

▸ *Hidden page timer (Q143) records time spent on this page.*

→

-- Screen #323 --

Q145

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #324 --

Q146

Now you will take the reading comprehension test for Passage 5.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #325 --

Q147

A fungus was used as medicine as early as what century?

- ◯ Sixteenth
- ◯ Seventeenth
- ◯ Eighteenth
- ◯ Nineteenth
- ◯ Tweenthieth

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #326 --

Q148

How many antibiotics have been discovered?

- ◯ Ninety-sixth
- ◯ Many-hundereds
- ◯ Thousands
- ◯ Millions
- ◯ An unspecified number

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #327 --

Q149

This passage is mainly about

- ergot
- drugs
- fungi
- antibiotics
- cheese

Response requested (participants are warned if they skip it).

→

-- Screen #328 --

Q150

LSD is specifically mentioned to show that ergot

- needs to be further controlled
- needs further research
- has medicinal value
- is of current interest
- is dangerous

Response requested (participants are warned if they skip it).

→

-- Screen #329 --

Q151

Passage 6 starts next

→

-- Screen #330 --

Q153

Local governments were our first governments.

▸ *Hidden page timer (Q152) records time spent on this page.*

→

-- Screen #331 --

Q154

Where you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #332 --

Q155

A local government was established when the oldest men in a primitive tribe formed a council and the tribe chose a chief.

→

-- Screen #333 --

Q156

The tribe was seeking a better, safer life.

→

-- Screen #334 --

Q157

In the same way, the first English settlers soon realized that they needed rules and leaders after they landed at Jamestown, Virginia in 1607.

→

-- Screen #335 --

Q158

At first, the settlers had to look out for themselves.

→

-- Screen #336 --

Q159

They searched for gold, and had to find their own food and provide their own shelter.

→

-- Screen #337 --

Q161

As food supplies began to run low, and as the colonists faced hunger and disease, they saw that they needed to work together if the colony was to survive.

▸ *Hidden page timer (Q160) records time spent on this page.*

→

-- Screen #338 --

Q162

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #339 --

Q163

So, they needed to work together if the colony was to survive.

→

-- Screen #340 --

Q164

The colonists formed a council to make laws for the colony.

→

-- Screen #341 --

Q165

They chose Captain John Smith as president of the council.

→

-- Screen #342 --

Q166

His job was to see that the laws were carried out.

→

-- Screen #343 --

Q168

This government at Jamestown was the first local government in America.

▸ *Hidden page timer (Q167) records time spent on this page.*

→

-- Screen #344 --

Q169

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #345 --

Q170

Today, local government is still the first and most important one in our lives.

→

-- Screen #346 --

Q172

It protects our lives, our safety, and our homes, and it helps to keep our environment clean.

▸ *Hidden page timer (Q171) records time spent on this page.*

→

-- Screen #347 --

Q173

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #348 --

Q174

Local government provides us with schools, libraries, and other important services.

→

-- Screen #349 --

Q175

Now you will take the reading comprehension test for Passage 6.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #350 --

Q176

The first colonial government was

- ◯ tribal
- ◯ city
- ◯ county
- ◯ local
- ◯ federal

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #351 --

Q177

The Jamestown colonists formed a government because of

- ◯ pride
- ◯ greed
- ◯ necessity
- ◯ togetherness
- ◯ public spirit

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #352 --

Q178

The best title for this selection would be

- ◯ John Smith
- ◯ The First Government
- ◯ Jamestown
- ◯ Local Government
- ◯ American Government

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #353 --

Q179

The overall goal of local government seems to be public

- ◯ regulation
- ◯ wealth
- ◯ growth
- ◯ welfare
- ◯ protection

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #354 --

Q180

Passage 7 starts next

→

-- Screen #355 --

Q181

Once in a while you will hear about an artist recognized as a master during his own lifetime but then almost forgotten soon after his death.

→

-- Screen #356 --

Q182

A good example is the painter Domenicos Theotocopoulos, known because of his Greek ancestry as El Greco.

→

-- Screen #357 --

Q184

After pursuing his early career in Italy, El Greco settled in the Spanish city of Toledo, where he prospered for the rest of his life.

▸ *Hidden page timer (Q183) records time spent on this page.*

→

-- Screen #358 --

Q185

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #359 --

Q186

But after his death, El Greco was forgotten by history for nearly three hundred years, until he was rediscovered by artists and critics of the twentieth century.

→

-- Screen #360 --

Q187

The power of El Greco's intensely emotional style can be felt most strongly in his later canvases, such as the famous View of Toledo painted in 1610, only a few years before death.

→

-- Screen #361 --

Q188

One notices in this strange landscape how the eerie, silvery buildings take on a ghost-like stillness next to the explosive light of the sky and the writhing forms of the countryside below.

→

-- Screen #362 --

Q189

Curiously enough, another important artist of about the same time was scorned even by many of his own contemporaries.

→

-- Screen #363 --

Q190

This artist was Caravaggio, a self-taught painter who had come to Rome around 1590 from a small town in Lombardy.

→

-- Screen #364 --

Q191

Caravaggio's critics complained that he treated exalted religious subjects in a low, vulgar style, because he included in his paintings the faces and figures from the street of common people.

→

-- Screen #365 --

Q193

By using stark contrasts of light and shadow, Caravaggio managed to conjure up unforgettable scenes of dramatic realism.

▸ *Hidden page timer (Q192) records time spent on this page.*

→

-- Screen #366 --

Q194

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #367 --

Q195

Now you will take the reading comprehension test for Passage 7.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #368 --

Q196

In his paintings, Caravaggio included

- ◯ common people
- ◯ strange landscapes
- ◯ eerie, silvery buildings
- ◯ ghosts
- ◯ corpses

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #369 --

Q197

El Greco pursued his early career in

- ◯ Italy
- ◯ Greece
- ◯ Lombardy
- ◯ Rome
- ◯ Toledo

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #370 --

Q198

Apparently a major technique of Caravaggio's was

- ◯ using exalted religious subjects
- ◯ using stark contrasts
- ◯ using cadavers
- ◯ using ghost-like stillness
- ◯ none of the above

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #371 --

Q199

The principal idea discussed in this passage concerns

- ◯ El Greco
- ◯ Caravaggio
- ◯ Contemporary approval of artists
- ◯ The travels of painters
- ◯ The prosperity of artists

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #372 --

Q200

Passage 8 starts next

→

-- Screen #373 --

Q201

Random assignment is the key to experimental design.

→

-- Screen #374 --

Q202

Random assignment insures that the results of experiments are not influenced by some extraneous variable.

→

-- Screen #375 --

Q203

An extraneous variable is one that is correlated with the variable under investigation.

→

-- Screen #376 --

Q204

In contrast, correlational designs allow subjects to assign themselves to conditions.

→

-- Screen #377 --

Q206

Thus, in the cancer studies as they have been done, only people who are four-pack-a-day smokers—by their own “choice”—get into a four-pack-a-day condition.

Hidden page timer (Q205) records time spent on this page.

→

-- Screen #378 --

Q207

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #379 --

Q208

But, the factors that make people four-pack-a-day smokers must surely make them different from typical nonsmokers in other ways.

→

-- Screen #380 --

Q210

Hence the ambiguity of interpretation in correlational designs, and hence the virtue of experimental designs.

Hidden page timer (Q209) records time spent on this page.

→

-- Screen #381 --

Q211

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #382 --

Q212

Differences among individual subjects cannot systematically confound the results if assignment to conditions is truly random.

→

-- Screen #383 --

Q214

Put another way, the experimenter has under his control all the variables that can influence the results.

▸ *Hidden page timer (Q213) records time spent on this page.*

→

-- Screen #384 --

Q215

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #385 --

Q216

It is another question as to whether they can exactly identify these variables.

→

-- Screen #386 --

Q217

Thus, the results from experimental designs are not entirely unambiguous, but they are less ambiguous than the results from correlational designs.

→

-- Screen #387 --

Q218

Now you will take the reading comprehension test for Passage 8.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #388 --

Q219

Specific mention is made of

- ◯ psychogenesis
- ◯ psychodynamics
- ◯ psychobiology
- ◯ psychotherapy
- ◯ none of the above

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #389 --

Q220

How many research design patterns were discussed?

- ◯ One only
- ◯ Two
- ◯ Three
- ◯ Four
- ◯ Five

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #390 --

Q221

As used in this passage, the phrase "put another way" means

- ◯ rephrasing
- ◯ enumeration
- ◯ using details
- ◯ reasoning
- ◯ illustration

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #391 --

Q222

In this passage the authors imply that heavy smoking is probably caused by

- ◯ tension
- ◯ nervousness
- ◯ habit
- ◯ social pressure
- ◯ all of the above and more

▸ *Response requested (participants are warned if they skip it).*

→

1B Block “Booklet 2: Odd Passages are Easy”

Block 5 Booklet 2: Odd Passages are Easy

-- Screen #392 --

Q223

Passage 1 starts next

→

-- Screen #393 --

Q224

Elizabeth Barrett was wise enough to see that Browning was a fine poet.

→

-- Screen #394 --

Q226

The young man with the lemon-colored gloves and long dark hair and high-strung, restless manner who had visited her in 1846 had been moved to write to her because she had praised his poetry.

Hidden page timer (Q225) records time spent on this page.

→

-- Screen #395 --

Q227

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #396 --

Q229

She found the man even more to her liking than the verse, and it was not so very long-only the time between May, 1845 and September, 1846-before Robert Browning had stolen the poetess from the dour father who guarded her like a dragon (never wanting her to marry any man), and taken her with him to Italy and a new life.

Hidden page timer (Q228) records time spent on this page.

→

-- Screen #397 --

Q230

Where you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #398 --

Q231

One morning, soon after Robert and Elizabeth married; she thrust a manuscript into Robert's pocket.

→

-- Screen #399 --

Q232

Then she ran up to her room, embarrassed by her action.

→

-- Screen #400 --

Q233

The manuscript was a sonnet sequence that she had written about their courtship and their love letters.

→

-- Screen #401 --

Q234

Mrs. Browning never intended for these poems to be published, but Robert promptly insisted that they must be.

→

-- Screen #402 --

Q235

He suggested calling them Sonnets from the Portuguese.

→

-- Screen #403 --

Q236

He may have suggested this title to hide the fact that the poems were personal.

→

-- Screen #404 --

Q237

He thought that these poems were “the finest sonnets written in our language since Shakespeare’s.”

→

-- Screen #405 --

Q238

Robert Browning’s opinion of Sonnets from the Portuguese was flattering to his wife, the same as his opinion of most of her poetry.

→

-- Screen #406 --

Q239

He thought that she was a better poet than he was, and the world at that time agreed with him.

→

-- Screen #407 --

Q240

He called her his “moon of poets,” and she considered him her sun.

→

-- Screen #408 --

Q241

Elizabeth Barrett Browning was a pure singer with a lovely lyrical tenderness.

→

-- Screen #409 --

Q242

She was the best poet of her sex since Sappho.

→

-- Screen #410 --

Q243

Her Sonnets reveal a woman’s secret soul like no other poetry in our literature up to that time.

→

-- Screen #411 --

Q244

They did so with autobiographical honesty, fine moderation and fullness.

→

-- Screen #412 --

Q245

Her lyrical mastery shines in many passages of her writings.

→

-- Screen #413 --

Q246

Italy was a kind of promised land for Elizabeth Browning.

→

-- Screen #414 --

Q247

In the summer, she and her husband lived in Florence or in little villages.

→

-- Screen #415 --

Q248

She drank in the sun of the south and the warmth of her husband’s love.

→

-- Screen #416 --

Q249

She blossomed in a life of delicate happiness for fifteen years.

→

-- Screen #417 --

Q250

She found friends in Italy, most of them cultured Americans.

→

-- Screen #418 --

Q252

Hawthorne saw the Browning's there: the New England thinker and essayist Margaret Fuller visited them.

▸ *Hidden page timer (Q251) records time spent on this page.*

→

-- Screen #419 --

Q253

Where you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #420 --

Q254

The painter Story and the young sculptress Harriet Hosmer came.

→

-- Screen #421 --

Q256

One caller records that Robert Browning was “simple, natural, and playful,” and that Mrs. Browning was all “genius and sensibility.”

▸ *Hidden page timer (Q255) records time spent on this page.*

→

-- Screen #422 --

Q257

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #423 --

Q259

Daytimes Browning walked forth with Elizabeth's little dog Flush, but he seldom could be lured from his home evenings.

▸ *Hidden page timer (Q258) records time spent on this page.*

→

-- Screen #424 --

Q260

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #425 --

Q262

One privileged intruder, coming frequently at night to join the poets over hot chestnuts and mulled wine, found talk good and laughter plentiful.

▸ *Hidden page timer (Q261) records time spent on this page.*

→

-- Screen #426 --

Q263

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #427 --

Q264

He found the talk good and the laughter plentiful.

→

-- Screen #428 --

Q265

The Brownings had a son, Robert Weidemann Browning, during the third year of their stay in Italy.

→

-- Screen #429 --

Q266

But a strain of dark dread began to creep through this happy life.

→

-- Screen #430 --

Q267

Elizabeth Browning's father died still disapproving of her marriage.

→

-- Screen #431 --

Q268

He had refused to see her or to allow any of his family to see her.

→

-- Screen #432 --

Q269

Elizabeth's dearly loved sister died and left three children who were all younger than her own boy.

→

-- Screen #433 --

Q270

Elizabeth drooped and grieved a little and Robert shielded her from ordinary visitors.

→

-- Screen #434 --

Q271

She had a sudden and alarming attack of sickness but was not considered in any danger.

→

-- Screen #435 --

Q272

One night, soon after, she awoke from a troubled sleep, apparently with no idea that she was about to leave Robert.

→

-- Screen #436 --

Q273

She spoke tenderly about her love for him. In his arms, her head drooped as though in a faint, but it was the end.

→

-- Screen #437 --

Q275

Profound and lasting was Browning's grief. “Looking back,” he said, “I see that we have been all the time walking over a torrent on a straw.”

▸ *Hidden page timer (Q274) records time spent on this page.*

→

-- Screen #438 --

Q276

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #439 --

Q277

Now you will take the reading comprehension test for Passage 1.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #440 --

Q278

Flush was the name of the Brownings'

- ◯ cat
- ◯ dog
- ◯ canary
- ◯ turtle
- ◯ thrush

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #441 --

Q279

At night the Brownings often enjoyed

- ◯ hot chestnuts
- ◯ a tart with clotted cream
- ◯ strawberries and cream
- ◯ café au lait
- ◯ cheese soufflé

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #442 --

Q280

The Brownings saw

- ◯ Coleridge
- ◯ Byron
- ◯ Walt Whitman
- ◯ Poe
- ◯ Hawthorne

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #443 --

Q281

Browning wrote to Miss Barrett because she had

- ◯ invited him to visit
- ◯ written him for advice
- ◯ praised his poetry
- ◯ sent him one of her own poems
- ◯ sent a friend to meet him

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #444 --

Q282

The authors of this passage placed most attention on the Brownings'

- ◯ literary efforts
- ◯ personal relationships
- ◯ social contacts
- ◯ problems
- ◯ early meetings

Response requested (participants are warned if they skip it).

→

-- Screen #445 --

Q283

What best describes the Brownings' early days abroad?

- ◯ Travel
- ◯ Relaxation
- ◯ Creative activity
- ◯ Intellectual stimulation
- ◯ Happiness

Response requested (participants are warned if they skip it).

→

-- Screen #446 --

Q284

You would assume that Browning

- ◯ found it easy to see Elizabeth
- ◯ carefully avoided Mr. Barrett
- ◯ begged Mr. Barrett's consent to marry
- ◯ understood Mr. Barrett
- ◯ got Elizabeth to ask her father's consent

Response requested (participants are warned if they skip it).

→

-- Screen #447 --

Q285

In the "Torrent on a straw" quotation, the word "straw" probably refers to

- ◯ the frailty of life
- ◯ weakness of character
- ◯ sorrow
- ◯ happiness
- ◯ the fleeting nature of fame

Response requested (participants are warned if they skip it).

→

-- Screen #448 --

Q286

Passage 2 starts next

→

-- Screen #449 --

Q287

The performance of those business activities that direct the flow of goods and services from producer to consumer or user is called marketing.

→

-- Screen #450 --

Q288

Marketing is the connecting link between the producer and the consumer or user.

→

-- Screen #451 --

Q289

Production and consumption are brought together by the marketing system.

→

-- Screen #452 --

Q290

Wholesaling or retailing activities are directly engaged in by approximately one in every six gainfully employed persons.

→

-- Screen #453 --

Q291

This ratio does not take into account other persons who are serving marketing through transportation, communication, and office vocations.

→

-- Screen #454 --

Q292

Opportunities for many kinds of positions requiring a wide range of skills and abilities are provided by marketing.

→

-- Screen #455 --

Q293

Although one naturally thinks of merchandising as being the primary occupation in marketing, there are opportunities in management, advertising, market and product research, and purchasing.

→

-- Screen #456 --

Q295

The economic well-being of one's country is determined largely by productivity, consumption, and employment.

▸ *Hidden page timer (Q294) records time spent on this page.*

→

-- Screen #457 --

Q296

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #458 --

Q297

All three are affected by the efficiency of the marketing process.

→

-- Screen #459 --

Q298

If marketing stimulates appetite, people will consume goods at a high rate.

→

-- Screen #460 --

Q300

High consumption requires high productivity to meet the requirements of people, and high productivity and high-level activity in marketing combined result in high employment.

▸ *Hidden page timer (Q299) records time spent on this page.*

→

-- Screen #461 --

Q301

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #462 --

Q302

Indirectly, marketing is a key to a high level of economic living for the people.

→

-- Screen #463 --

Q303

Now you will take the reading comprehension test for Passage 2.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #464 --

Q304

Our economic well-being is determined largely by how many factors?

- ◯ One
- ◯ Two
- ◯ Three
- ◯ Four
- ◯ Five

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #465 --

Q305

One major factor mentioned as affecting our economic well-being was

- ◯ high wages
- ◯ low interest rates
- ◯ technology
- ◯ employment
- ◯ foreign trade

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #466 --

Q306

The purpose of this passage is to

- ◯ persuade
- ◯ guide
- ◯ evaluate
- ◯ inform
- ◯ interest

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #467 --

Q307

The chief emphasis is on

- ◯ defining
- ◯ principles of marketing
- ◯ opportunities in marketing
- ◯ kinds of jobs in marketing
- ◯ the economic significance of marketing

Response requested (participants are warned if they skip it).

→

-- Screen #468 --

Q308

Passage 3 starts next

→

-- Screen #469 --

Q309

The nucleus of an atom is held together by a kind of energy called atomic energy.

→

-- Screen #470 --

Q310

The sun’s energy comes from atomic reactions.

→

-- Screen #471 --

Q311

These reactions occur when the nuclei of hydrogen build up the nuclei of helium.

→

-- Screen #472 --

Q312

An atomic nucleus is made of particles, but the mass of the atomic nucleus is less than the total mass of the particles.

→

-- Screen #473 --

Q313

The reason for this is that part of the mass of particles is changed into energy when a nucleus is formed.

→

-- Screen #474 --

Q314

This energy then radiates away.

→

-- Screen #475 --

Q316

The quantity of energy released in reactions of this kind is almost inconceivably greater than the quantity released by any other type of reaction involving similar quantities of material.

Hidden page timer (Q315) records time spent on this page.

→

-- Screen #476 --

Q317

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #477 --

Q318

Every second, the sun sends a million times more energy into space than we have stored in all of our coal, petroleum, and natural gas fields.

→

-- Screen #478 --

Q319

We could revolutionize the world if we could duplicate the method that releases such energy.

→

-- Screen #479 --

Q320

This possibility is not a fantasy, just as it was not a fantasy to imagine developing an atom bomb in 1900.

→

-- Screen #480 --

Q322

The time may come when the hydrogen from a cubic mile of sea water will provide enough energy to satisfy our needs at the 1960 rate for 300 centuries.

Hidden page timer (Q321) records time spent on this page.

→

-- Screen #481 --

Q323

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #482 --

Q324

Now you will take the reading comprehension test for Passage 3.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #483 --

Q325

How much sea water was mentioned?

- ◯ One ton
- ◯ A cubic acre
- ◯ A cubic mile
- ◯ A thousand gallons
- ◯ A hundred tons

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #484 --

Q326

The quantity of energy released in an atomic reaction is spoken of as how much greater than with other types of reactions?

- ◯ Far greater
- ◯ Unbelievably greater
- ◯ A thousand times greater
- ◯ Inconceivably greater
- ◯ Tremendously greater

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #485 --

Q327

The primary focus is on

- ◯ how energy is released
- ◯ where energy is found
- ◯ the energy from atomic reactions
- ◯ what happens in an atomic reaction
- ◯ the energy present in sunshine

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #486 --

Q328

This passage is best described as

- ◯ objective
- ◯ skeptical
- ◯ cautious
- ◯ conservative
- ◯ optimistic

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #487 --

Q329

Passage 4 starts next

→

-- Screen #488 --

Q330

Even most skeptics, because they seem to share the hope that there is life on Mars, endeavor slavishly not to discount the possibility.

→

-- Screen #489 --

Q331

But it was a comedown in the mid-1960's when scientists involved in the Mars exploration studied photographs taken by some of the early Mariner space flights.

→

-- Screen #490 --

Q332

No canals.

→

-- Screen #491 --

Q333

No seas.

→

-- Screen #492 --

Q334

No busy Martian engineers.

→

-- Screen #493 --

Q335

No menacing warmongering Martians as colossal as skyscrapers.

→

-- Screen #494 --

Q336

Just mountains, craters, frigid winds, and dust storms.

→

-- Screen #495 --

Q338

It was almost as if scouts for Columbus had returned to Isabella's court with the news that the world had turned out to be flat after all.

Hidden page timer (Q337) records time spent on this page.

→

-- Screen #496 --

Q339

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #497 --

Q341

Hopeful astronomers reminded us that the Mariner IV had photographed a mere one percent of the Martian surface from 2,000 miles away.

Hidden page timer (Q340) records time spent on this page.

→

-- Screen #498 --

Q342

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #499 --

Q344

And they pointed out that the Earth-orbiting Tiros weather satellite shot over 20,000 pictures before uncovering any evidence of life on Earth.

Hidden page timer (Q343) records time spent on this page.

→

-- Screen #500 --

Q345

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #501 --

Q347

But still, public enthusiasm for Martian exploration wilted.

Hidden page timer (Q346) records time spent on this page.

→

-- Screen #502 --

Q348

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #503 --

Q349

By the time Viking I touched down on the Plain of Chryse in August, few seemed to care at all.

→

-- Screen #504 --

Q350

J. Richard Keefe, one of the Viking scientists, declared himself “disgusted” at what he called the “blasé…apathetic” public response and the skimpy television coverage of what was certainly one of the magnificent scientific and technical accomplishments in human history.

→

-- Screen #505 --

Q351

Now you will take the reading comprehension test for Passage 4.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #506 --

Q352

One weather satellite was named

- ◯ Latos
- ◯ Tiros
- ◯ Prometheus
- ◯ Sonar
- ◯ Satelos

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #507 --

Q353

One of the Mariners photographed how much of the surface of Mars?

- ◯ One percent
- ◯ Two percent
- ◯ Three percent
- ◯ Four percent
- ◯ Five percent

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #508 --

Q354

Interest in Mars diminished largely because

- ◯ no Martians were found
- ◯ the TV coverage was poor
- ◯ the photos were all black and white
- ◯ nothing was brought back to earth
- ◯ the media did not appreciate the accomplishment

Response requested (participants are warned if they skip it).

→

-- Screen #509 --

Q355

Mention of the flat world was used to point out

- ◯ the flatness of Mars
- ◯ the lack of canals
- ◯ the lack of seas
- ◯ the lack of Martians
- ◯ the lack of Mountains

Response requested (participants are warned if they skip it).

→

-- Screen #510 --

Q356

Passage 5 starts next

→

-- Screen #511 --

Q357

Fungi give cheese the flavor, odor, and character that gourmets so highly prize.

→

-- Screen #512 --

Q358

One of the first molds was found in caves near the French village of Roquefort.

→

-- Screen #513 --

Q359

According to legend, a peasant boy left his lunch, which was a mild fresh piece of goat cheese, in one of the caves.

→

-- Screen #514 --

Q360

When he returned, he found the cheese marbled, tart, and fragrant.

→

-- Screen #515 --

Q361

Only cheeses that come from the area around these particular caves are allowed to bear the name of Roquefort.

→

-- Screen #516 --

Q363

As early as the seventeenth century, ergot, the fungus of rye, was used to facilitate childbirth.

Hidden page timer (Q362) records time spent on this page.

→

-- Screen #517 --

Q364

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #518 --

Q365

It causes the contraction of involuntary muscles, particularly in the uterus.

→

-- Screen #519 --

Q367

In the twentieth century, ergot has once more attracted interest as the source of the chemical from which the hallucinogenic drug LSD is derived.

Hidden page timer (Q366) records time spent on this page.

→

-- Screen #520 --

Q368

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #521 --

Q369

Most modern antibiotics are produced by fungi.

→

-- Screen #522 --

Q370

Alexander Fleming discovered the first of these antibiotics.

→

-- Screen #523 --

Q371

A mold of the genus Penicillium had contaminated a culture of staphylococcus bacteria that was growing on a nutrient agar plate.

→

-- Screen #524 --

Q372

Alexander noted that the mold completely halted the growth of the bacteria.

→

-- Screen #525 --

Q374

Antibiotics, of which many hundreds have now been discovered, are substances produced by a living organism that injure another living organism.

▸ *Hidden page timer (Q373) records time spent on this page.*

→

-- Screen #526 --

Q375

Where you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #527 --

Q376

All of these are substances produced by one living organism that injures another living organism.

→

-- Screen #528 --

Q377

Now you will take the reading comprehension test for Passage 5.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #529 --

Q378

A fungus was used as medicine as early as what century?

- ◯ Sixteenth
- ◯ Seventeenth
- ◯ Eighteenth
- ◯ Nineteenth
- ◯ Twentieth

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #530 --

Q379

How many antibiotics have been discovered?

- ◯ Ninety-six
- ◯ Many hundreds
- ◯ Thousands
- ◯ Millions
- ◯ An unspecified number

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #531 --

Q380

This passage was mainly about

- ergot
- drugs
- fungi
- antibiotics
- cheese

Response requested (participants are warned if they skip it).

→

-- Screen #532 --

Q381

LSD is specifically mentioned to show that ergot

- needs to be further measured
- needs further research
- has medicinal value
- is of current interest
- is dangerous

Response requested (participants are warned if they skip it).

→

-- Screen #533 --

Q382

Passage 6 starts next

→

-- Screen #534 --

Q384

Local governments were our first governments.

▸ *Hidden page timer (Q383) records time spent on this page.*

→

-- Screen #535 --

Q385

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #536 --

Q386

The primitive tribe that chose the strongest man to be its chief and the oldest men to form a council was establishing local government.

→

-- Screen #537 --

Q387

It was seeking a better, safer life.

→

-- Screen #538 --

Q388

In the same way, the need for rules and leaders was realized by the first English settlers who landed at Jamestown, Virginia, in 1607.

→

-- Screen #539 --

Q389

At first, the settlers at Jamestown had to shepherd themselves.

→

-- Screen #540 --

Q390

The colonists searched for gold, and had to find their own sustenance and provide their own sanctuary.

→

-- Screen #541 --

Q392

As food supplies began to run low, and as the colonists faced hunger and disease, they saw that they needed to work together if the colony was to survive.

▸ *Hidden page timer (Q391) records time spent on this page.*

→

-- Screen #542 --

Q393

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #543 --

Q394

A council to make laws for the colony was formed by the settlers.

→

-- Screen #544 --

Q395

Captain John Smith was chosen as president of the council to see that the laws were implemented.

→

-- Screen #545 --

Q397

This government at Jamestown was the first local government in America.

▸ *Hidden page timer (Q396) records time spent on this page.*

→

-- Screen #546 --

Q398

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #547 --

Q399

Today, local government is still the first and most important government in our lives.

→

-- Screen #548 --

Q401

It protects our lives, our safety, and our homes, and it helps to keep our environment clean.

▸ *Hidden page timer (Q400) records time spent on this page.*

→

-- Screen #549 --

Q402

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #550 --

Q403

Schools, libraries, and other important services are provided to us by local government.

→

-- Screen #551 --

Q404

Now you will take the reading comprehension test for Passage 6.
The questions are in multiple choice format.
The test is self-paced.

→

-- Screen #552 --

Q405

The first colonial government was

- ◯ tribal
- ◯ city
- ◯ county
- ◯ local
- ◯ federal

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #553 --

Q406

The Jamestown colonists formed a government because of

- ◯ pride
- ◯ greed
- ◯ necessity
- ◯ togetherness
- ◯ public spirit

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #554 --

Q407

The best title for this selection would be

- ◯ John Smith
- ◯ The First Government
- ◯ Jamestown
- ◯ Local Government
- ◯ American Government

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #555 --

Q408

The overall goal of local government seems to be public

- ◯ regulation
- ◯ wealth
- ◯ growth
- ◯ welfare
- ◯ protection

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #556 --

Q409

Passage 7 starts next

→

-- Screen #557 --

Q410

Once in a while you will hear about an artist who was recognized as a master during his lifetime, but was then almost forgotten after his death.

→

-- Screen #558 --

Q411

A good example is the painter, Domenicos Theotocopoulos.

→

-- Screen #559 --

Q412

He was known as El Greco because of his Greek ancestry.

→

-- Screen #560 --

Q414

After pursuing his early career in Italy, El Greco settled in the Spanish city of Toledo, where he prospered for the rest of his life.

▸ *Hidden page timer (Q413) records time spent on this page.*

→

-- Screen #561 --

Q415

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #562 --

Q416

He prospered there for the rest of his life.

→

-- Screen #563 --

Q417

History forgot El Greco for nearly three hundred years.

→

-- Screen #564 --

Q418

Then, artists and critics of the twentieth century rediscovered him.

→

-- Screen #565 --

Q419

The power of El Greco's intensely emotional style can be felt most strongly in his later paintings, such as the famous View of Toledo.

→

-- Screen #566 --

Q420

He painted this canvas in 1610, only a few years before his death.

→

-- Screen #567 --

Q421

It is a strange landscape.

→

-- Screen #568 --

Q422

One notices that eerie, silvery buildings take on a ghost-like stillness next to the explosive light of the sky and the writhing forms of the countryside below.

→

-- Screen #569 --

Q423

Curiously, about the same time, another important artist was scorned even by many of his contemporaries.

→

-- Screen #570 --

Q424

This artist was Caravaggio.

→

-- Screen #571 --

Q425

He was a self-taught painter who came to Rome around 1590 from a small town in Lombardy.

→

-- Screen #572 --

Q426

Caravaggio's critics complained that he treated sacred religious subjects in a low, vulgar way by including the faces and figures of common people in his paintings.

→

-- Screen #573 --

Q428

By using stark contrasts of light and shadow, Caravaggio managed to conjure up unforgettable scenes of dramatic realism.

Hidden page timer (Q427) records time spent on this page.

→

-- Screen #574 --

Q429

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

Response requested (participants are warned if they skip it).

→

-- Screen #575 --

Q430

Now you will take the reading comprehension test for Passage 7.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #576 --

Q431

In his painting, Caravaggio included

- ◯ common people
- ◯ strange landscapes
- ◯ eerie, silvery buildings
- ◯ ghosts
- ◯ corpses

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #577 --

Q432

El Greco pursued his early career in

- ◯ Italy
- ◯ Greece
- ◯ Lombardy
- ◯ Rome
- ◯ Toledo

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #578 --

Q433

Apparently a major technique of Caravaggio's was

- ◯ using exalted religious subjects
- ◯ using stark contrasts
- ◯ using cadavers
- ◯ using ghost-like stillness
- ◯ none of the above

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #579 --

Q434

The principal idea discussed in this passage concerns

- ◯ El Greco
- ◯ Caravaggio
- ◯ Contemporary approval of artists
- ◯ The travels of painters
- ◯ The prosperity of artists

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #580 --

Q435

Passage 8 starts next

→

-- Screen #581 --

Q436

The key to the design called experimental is assignment of subjects to conditions randomly.

→

-- Screen #582 --

Q437

By the influence on the results of some extraneous variable that is tied to or correlated with the variable under investigation is insured against.

→

-- Screen #583 --

Q438

By contrast with experimental designs, subjects, in correlational designs, in a sense, assign themselves to conditions.

→

-- Screen #584 --

Q440

Thus, in the cancer studies as they have been done, only people who are four-pack-a-day smokers—by their own “choice”—get into a four-pack-a-day condition.

▸ *Hidden page timer (Q439) records time spent on this page.*

→

-- Screen #585 --

Q441

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #586 --

Q442

Whatever the factors are that contribute to a person's being a heavy smoker surely must also make him different from the typical nonsmoker in other ways.

→

-- Screen #587 --

Q444

Hence the ambiguity of interpretation in correlational designs, and hence the virtue of experimental designs.

▸ *Hidden page timer (Q443) records time spent on this page.*

→

-- Screen #588 --

Q445

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #589 --

Q446

In the latter case, if assignment to conditions is truly random then prevailing differences among individual subjects cannot confound the results systematically.

→

-- Screen #590 --

Q448

Put another way, the experimenter has under his control all the variables that can influence the results.

▸ *Hidden page timer (Q447) records time spent on this page.*

→

-- Screen #591 --

Q449

Were you mind wandering when you read the previous sentence?

- ◯ Yes
- ◯ No

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #592 --

Q450

Whether he can exactly identify these variables is another question.

→

-- Screen #593 --

Q451

Thus, entirely unambiguous results are not yielded by experimental designs, merely results that are less ambiguous than those associated with correlational designs.

→

-- Screen #594 --

Q452

Now you will take the reading comprehension test for Passage 8.

The questions are in multiple choice format.

The test is self-paced.

→

-- Screen #595 --

Q453

Specific mention is made of

- ◯ psychogenesis
- ◯ psychodynamics
- ◯ psychobiology
- ◯ psychotherapy
- ◯ none of the above

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #596 --

Q454

How many research design patterns were discussed?

- ◯ Only one
- ◯ Two
- ◯ Three
- ◯ Four
- ◯ Five

▸ *Response requested (participants are warned if they skip it).*

→

-- Screen #597 --

Q455

As used in this passage, the phrase "put another way" means

- ◯ rephrasing
- ◯ enumeration
- ◯ using details
- ◯ reasoning
- ◯ illustration

▸ *Response requested (participants are warned if they skip it).*

→
